***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1 March 2007 has been entered in which claim 1 was amended. Claims 1-13 are pending.

***Allowable Subject Matter***

2. Claims 1-13 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claims 1-12 are allowable over the prior art for at least the reason that the prior art fails to teach and/or suggest an optical system with "an axis defined as extending between a source of a light beam and the first optical device, wherein the source of the light beam, the variable wave plate, the reticle, and the first optical device all lie along the axis" as set forth in the claimed combination.

Matsumoto et al., JP 06-215997, disclose an optical system (fig. 1) comprising: a wave plate (16); a reticle (14); and a first optical device (13), wherein the wave plate (16) is positioned along the axis (fig. 1) next to the reticle (14) and before the first optical device but does not disclose a variable waveplate and an axis defined as extending between a source of a light beam

Art Unit: 2872

and the first optical device, wherein the source of the light beam, the variable wave plate, the reticle, and the first optical device all lie along the axis as claimed.

Claim 13 is allowable over the prior art for at least the reason that the prior art fails to teach and/or suggest a system with a first quarter-wave plate positioned between the beam splitter and the reflective device as set forth in the claimed combination.

Matsumoto further comprises a beam splitter (15) and a second quarter-wave plate (17) positioned between the beam splitter (15) and the reflective device (12) but it does not have a first quarter-wave plate (in addition to a variable wave plate) positioned between the beam splitter and the reflective device as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
